

Yelvertoft Solar Farm- Construction Update

Construction progress

- The verification report regarding the swale works has been submitted to West Northamptonshire Council.
- The following works are on-going:
 - Tower works for grid connection
 - Works on the bell mouth at the site access on Crick Road
 - Cabling works associated with grid connection
- A single lane road closure on Crick Road to enable connection works is scheduled for mid-December and is expected to last for a week.

Grid connection works

Progress on other matters and next steps

- No questions or comments from the public were received in November.
- It is expected that the substation and high voltage infrastructure for connection will be completed in January.
- Energisation of the solar farm is expected in late February, subject to working with National Grid on timings.
